Kiss Me

Cassie

Can I just, just kiss you if it's alright?
Can I do that?One touch can bring us closer
Don't want this to be over
You know that you complete me
Your love is what I needDon't rush to see you leaving
Stay with me while I'm sleeping
'Cause you know what you do to me
I'm weak and you know my heart is beatingOne, two, three, kiss, that's when I know that we
Four, five, six, kiss, have the right chemistry
You don't have to hold back or be shy
I can feel you want me in your eyes
One, two, three, kiss, that's when I know that we
Four, five, six, kiss, have the right chemistry
Feels so good 'cause I know that you're mine
Boy, I got my eyes closed 'cause you know that ILove it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss meLove it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss meOoh girl, I'm coming over
You know I wanna hold ya
Kiss you, 'cause I know you want me too
I want to give you what you'll like
So, so please don't be afraid to
To tell me what'll make you
Reach the top, girl, I'm needing it
'Cause baby, I can feel your heart beatingOne, two, three, kiss, that's when I know that we
Four, five, six, kiss, have the right chemistry
You don't have to hold back or be shy
I can feel you want me in your eyesOne, two, three, kiss, that's when I know that we
Four, five, six, kiss, have the right chemistry
Feels so good 'cause I know that you're mine
Boy, I got my eyes closed 'cause you know that ILove it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss meLove it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss meOoh, baby, love it when you kiss me
I barely can breathe
Love it when you kiss meLove it when you kiss me

Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss meLove it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
