Natural Disaster (UK Radio Edit)

Laidback Luke & Example

My friend said think all the bad things
My friend said thing all the fights
And then it should be easier to walk away
No more sleepless nightsAnd even though I don't need you
You're clearly the best thing that happened to me
We should be happy ever after
Happiness and laughter... what a natural disasterNeed to tell myself I don't care
Need to tell myself you're not thereNeed some air, need some space (x2)
Need some air... the way I'm feeling I just don't careAnd even though I don't need you
You're clearly the best thing that happened to me
We should be happy ever after
Happiness and laughter what a natural disaster
Don't take it for a fool, never
We've been floating down the one way river
No way back can't paddle upstream
I supposed I had a fucked up dreamHad enough of you had enough of me
What can I say, I'm in a one man team
Scheming, dreaming wheeler dealing
Feeling strange I'm in love with the sceneGeneral malice, seminal talent
Two many brain sells, chemical imbalance
One day soon I'll get it all examined
'Till then I'm going all Biff TannenRewrite the future, new ruler
Too cool now, well it don't suit ya'
This is Starship Troopers livin' in a whole other planetReboot computer (x2)
Need to tell myself I don't care
Need to tell myself you're not thereNeed some air, need some space (x2)
Need some air... the way I'm feeling I just don't careAnd even though I don't need you
You're clearly the best thing that happened to me
We should be happy ever after
Happiness and laughter what a natural disasterYou're far too good for me
Said you're far too good for me
We should be happy ever after
Happiness and laughter... what a natural disaster.
