Now That I've Found You (feat. John & Michel)

Martin Garrix

Flashback to the time in your life
When you thought it would be easy
But it's hard when you take on the world aloneThe one shot that you fire at the sky
Hoping someone else can see it
Just a sign that you're not out there on your ownWe come one tonight
I've been waiting for your wake-up call
Growing stronger now
I can hear it in a thunderstormWe sing, oooooh
I don't want to do this without you
Oooooh
I won't let go now that I've found you
Now that I've found you
Oooooh
I won't let go now that I've found you
Oooooh
I won't let go now that I've found you
Now that I've found youSome say you can never go back
To the city built for dreamers
But I know we can find it on our ownThe one shot that we fire at the sky
But this time we are together
We're right here in this moment where we belongWe come one tonight
I've been waiting for your wake-up call
Growing stronger now
I can hear it in a thunderstorm
We sing, oooooh
I don't want to do this without you
Oooooh
I won't let go now that I've found you
Now that I've found youNow that I've found you
Oooooh
I won't let go now that I've found you
Now that I've found you
