

Natural Disaster (Radio Edit)

Laidback Luke & Example

My friend said think all the bad things
My friend said thing all the fights
And then it should be easier to walk away
No more sleepless nights And even though I don't need you
You're clearly the best thing that happened to me
We should be happy ever after
Happiness and laughter... what a natural disaster Need to tell myself I don't care
Need to tell myself you're not there Need some air, need some space (x2)
Need some air... the way I'm feeling I just don't care And even though I don't need you
You're clearly the best thing that happened to me
We should be happy ever after
Happiness and laughter what a natural disaster
Don't take it for a fool, never
We've been floating down the one way river
No way back can't paddle upstream
I supposed I had a fucked up dream Had enough of you had enough of me
What can I say, I'm in a one man team
Scheming, dreaming wheeler dealing
Feeling strange I'm in love with the scene General malice, seminal talent
Two many brain sells, chemical imbalance
One day soon I'll get it all examined
'Till then I'm going all Biff Tannen Rewrite the future, new ruler
Too cool now, well it don't suit ya'
This is Starship Troopers livin' in a whole other planet Reboot computer (x2)
Need to tell myself I don't care
Need to tell myself you're not there Need some air, need some space (x2)
Need some air... the way I'm feeling I just don't care And even though I don't need you
You're clearly the best thing that happened to me
We should be happy ever after
Happiness and laughter what a natural disaster You're far too good for me
Said you're far too good for me
We should be happy ever after
Happiness and laughter... what a natural disaster.
