Comeback

Kane Brown

Six months passed since we both said goodbye

Never thought I'd run into you here tonight

And I can't ever think your smile's the same as it was back when I saw you every day

I probably shouldn't say it

What I'm about to sayWe could make a comeback if you come back

We were on top of the world people wanted what we had

We could have it again don't you know that

We could make a comeback if you come back

You haven't stopped me yet so I guess I'll keep going on

Oh, and I haven't even deleted your number from my phone

I've been wanting to call you every single day but I couldn't think how to rephrase everything So just tell me, babe

If you feel the same wayWe could make a comeback if you come back

We were on top of the world people wanted what we had

We could have it again don't you know that

We could make a comeback if you come backWe could make a comeback if you just come back

We could make a comeback if you come back

We were on top of the world people wanted what we had

We could have it again don't you know that

We could make a comeback if you come backSix months passed since we both said goodbye Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
