

# Easy Does It

Jake Owen

The night is early and the sky's still blue  
Ain't even got to where we're going to  
And you're nibblin' and whisperin' in my ear  
What you wanna do? Baby I do too Well I don't wanna take this night too fast  
It's just beginning, wait a minute, let's make it last Easy does it  
We're gonna take our time, girl we got all night  
No need to rush it  
Let's just kick back and relax  
Slow it on down, soak up this moment  
Easy does it  
The summer sun is finally going down  
Parked on this back road not a soul around  
And we're kissing and listening to the radio  
When "Let's Get It On" just happened to come on  
Well all day long I've been playin' it cool  
You say, "Boy I wanna, when you gonna make your move?" Easy does it  
We're gonna take our time, girl we got all night  
No need to rush it  
Let's just kick back and relax  
Slow it on down, soak up this moment  
Easy does it  
Easy does it  
We're gonna take our time, girl we got all night  
No need to rush it  
Let's just kick on back and relax  
Slow it on down, soak up this moment  
Easy does it Ahh, easy does it
