

# Venus

## Air

You could be from Venus  
I could be from Mars  
We would be together  
Lovers forever  
Care for each other You could live in the sea  
And I could be a bird  
We would be together  
Lovers forever  
Care for each other If you were an illusion  
I would make it real  
We would be together  
Lovers forever  
Care for each other  
If you walk in the sun  
I would be your shadow  
We would be together  
Lovers forever  
Care for each other
