Help You

Trampled By Turtles

I think about you baby
And I can't breathe at all
(I) stall without you baby
An engine 'til I fall
And I fell so hard
This time
All you wanted was a man
That could help you baby
Help you baby
But I can't help at all
Though I tried
The best I can
Past my prime now daily
I have to sit and think
Turn out the lights and maybe
I'll have another drink
There's still a spark in your eyes
All you wanted was a man
That could help you baby
Help you baby
But I can't help at all
Though I tried
The best I can
Whispering winds come gently
And ease me to my feet
But there's blood in the air
And nice cars on the street
Just find a good place to hide
All you wanted was a man
That could help you baby
Help you baby
But I can't help at all
Though I tried
The best I can
I tried the best I can
I tried the best I can
