When You're Falling (Verse) [feat. Peter Gabriel]

Afro Celt Sound System

Everyday, you crawl into the night A fallen angel, with your wings set alight When you hit the ground Everything turns to blue I can't get through the smoke That's surrounding you Cause when you're falling I can't tell which way is down And when you're screaming Somehow I don't hear a sound And when you're seeing things Then your feet don't touch the ground Cause when you're falling I can't tell which way is down I can see through the clouds I can walk right through the walls Hang me off the ceiling But I can't take the fall Should have crossed the river But I may get swept away Out there on the water You can still see me wave Cause when you're falling I can't tell which way is down When you're falling I can't tell which way is down I keep seeing all those things My feet don't touch the ground Cause when you're falling I can't tell which way is down And when you're screaming Somehow I don't hear a sound And when you're seeing things Then your feet don't touch the ground Don't touch the ground Cause when you're falling I can't tell which way is down And when your screaming Somehow I don't hear a sound I don't hear a sound

I can't hear a sound, I can't hear a sound

No sound

Cause when you're falling

I can't tell which way is down

And when you're screaming

Somehow I don't hear a soundCause when you're falling

I can't tell which way is down

And when you're screaming

Somehow I don't hear a soundCause when you're fallingCause when you're fallingWhen you're screaming

Somehow I don't hear a sound
