

# Somebody

RHODES

Its late tho im lonely through the night  
I wanna see somebody somebody  
Shimmer in the glass see my reflection  
I wanna see somebody I wanna take you higher higher  
Than we could ever go  
And you ever could know  
But i don't know who you are  
I don't know who you are  
Im not the same anymore  
Maybe i've gone too far Stars when i see what you see  
When i leave my body my body  
My head fell to look down at my hands  
I wanna be somebody  
I wanna take you higher higher  
Than we could ever go  
And you ever could know  
But i don't know who you are  
I don't know who you are  
Im not the same anymore  
Maybe we've gone too far  
But i don't know who you are  
I don't know who you are  
Im not the same anymore  
Maybe we've gone too far  
But i need to find an easy way to live  
But i need to find an easy way to give you my heart  
And i need to find an easy way to live in my mind  
But i don't know who you are  
I don't know who you are  
Im not the same anymore  
Maybe we've gone too far  
But i dont know who you are  
I don't know who you are  
Im not the same anymore  
Maybe we've gone too far  
But i need to find an easy way to live  
But i need to find an easy way to give you my heart  
But i need to find an easy way to live  
But i need to find an easy way to give you my heart
