

# Tunnels

## Nothing More

In the tunnels of life  
We hold our breath, we close our eyes  
Stiff as a board to the other side  
We fill our lungs and we pray for light  
We fill our lungs and we pray for light  
I will make it through this  
Digging deep, sinking in  
I'm done with everything holding, holding me down  
I will make it through this  
There's a time to die and a way to live  
I'm not going out like this  
Always smile and pretend  
We want to give up, we want to give in  
When hopelessness is content (yeah)  
We feel our worlds caving in  
We feel our worlds caving in (yeah)  
I will make it through this  
Digging deep, sinking in  
I'm done with everything holding, holding me down  
I will make it through this  
There's a time to die and a way to live  
I'm not going out like this  
Like this, now  
We are the light  
We are the dream  
We are everything we need  
Just breathe  
Just breathe  
We got the strength, down to the bone  
We got the grip that shapes the mold  
We make our own (we make our own)  
We make our own  
It's all risk, don't ever regret  
Taking every chance we get  
To make our own, to make our own, yeah  
I will make it through this  
Digging deep, sinking in  
I'm done with everything holding, holding me down  
I will make it through this  
There's a time to die and a way to live  
I'm not going out like this  
Like this, now  
I gasp for air  
It's getting thin  
I'm blacking out  
It's shedding skin  
As I trudge forward  
I believe

I feel the light lifting me Just breathe  
Just breathe  
Just breathe
