

# Stand Up

## Trapt

Why don't you let me be  
leave me alone  
you start a fire inside that I could never control  
you wanna see a reaction come on and cut me down  
I've gone as far as I'll go  
Now I'm crossing the line and I am letting you know  
well here's your reaction Stand up  
I have had enough Walk away before I finish what you started  
face to face I will put you in your place  
End this game before I finish what you started  
Face to face everything will change  
You planted the seed  
how my anger has grown  
got a feeling inside I can't seem to control  
you wanna see a reaction come on and cut me down  
I've gone as far as I'll go  
Now I'm crossing the line and I am letting you know  
well here's your reaction Stand up  
I have had enough Walk away before I finish what you started  
face to face I will put you in your place  
End this game before I finish what you started  
Face to face everything will change Insult after insult after insult  
after insult after insult after insult  
after insult after insult after insult  
after INSULT!  
Stand up  
I have had enough Walk away before I finish what you started  
face to face I will put you in your place  
End this game before I finish what you started  
Face to face everything will change Walk away  
everything will change  
end this game  
wanna see a reaction  
you wanna see a reaction?  
stand up
