

Intuition (feat. Engelina)

DJ Encore

Ooh, ooh...
I have come all this way
Time to make a turn
Will I make it right
I'll live and I'll learn
I'm playing my own song now
I will survive a change of key
Because I follow this guideline
Hiding inside of me Found an answer in my heart that I will follow
It might keep sanity at bay
But I'll be hollow not to give a part of me
I get so much from you
Could this really be a wrong when it feels right to do
Ooh, ooh...
Feels like my past
Is a page I turn
In a book of fate
I've lived and I've learned
I'm playing my own game now
I'm making rules I won't pretend
When intuition conquers you
You will win in the end Found an answer in my heart that I will follow
It might keep sanity at bay
But I'll be hollow not to give a part of me
I get so much from you
Could this really be a wrong when it feels right to do Easy drifting away on believing
Never give up on a feeling
Found an answer in my heart
Found an answer in my heart Found an answer in my heart that I will follow
It might keep sanity at bay
But I'll be hollow not to give a part of me
I get so much from you
Could this really be a wrong when it feels right to do
