

Put the Fire Out

The Colourist

If you wanna be the life of the party
Put the fire out, put the fire out
You wanna be my little, do it for hours
You're the only one, you're the only one You can raise up your voice but you don't have to
You can roll up your sleeves but you don't need to
We can do what you want but we don't have to
Put the fire out, put the fire out Tell me that it could be worse
Just let it be and you will see
The better side
Put the fire out, put the fire out For all we have it could be worse
Just talk to me and we will see
The better side
Put the fire out, put the fire out - tonight
Don't run from your problems just put them on hold
I can show you how, I can show you how
The last thing you want is to be alone
Put the fire out, put the fire out
You can raise up your voice but you don't have to
You can roll up your sleeves but you don't need to
We can do what you want but we don't have to
Put the fire out, put the fire out Tell me that it could be worse
Just let it be and you will see
The better side
Put the fire out, put the fire out For all we have it could be worse
Just talk to me and we will see
The better side
Put the fire out, put the fire out - tonight
Tell me that it could be worse
Just let it be and you will see
The better side
Put the fire out, put the fire out For all we have it could be worse
Just talk to me and we will see
The better side
Put the fire out, put the fire out - tonight
