Still

Little Big Town

You
What you do
You always find a way to make me fall in
Love
Deep in love
I'm reminded every time we touchYou're still the sweetest dream I know
Still the place I want to go
Still the one thought on my mind
After all this time
You're still in my heart
You're still in my heartYou
It's always been you
There's never been another that comes close to
You
And the way you move me
Every time's like a first time, baby
You're still the sweetest dream I know
Still the place I want to go
Still the one thought on my mind
After all this time
You're still in my heart
You're still in my heartStill want you
Still need you
Still living just to love you
Still crave you
Still breathe you
Still give my whole world for you
You're still the one star in my sky
Still the real love in my life
Still the beginning and the end
I'd do it all again and
You're still the sweetest dream I know
Still the place I want to go
Still the one thought on my mind
After all this time
You're still in my heart
You're still in my heartStill want you
Still need you
Still living just to love you
You're still in my heart
Still crave you
Still breathe you

Still give my whole world for you
You're still in my heart
