

Small World

Idina Menzel

I'm standing in a field
My feet lift of the ground
No one here will see me
No one will hurt me now I'm brushing off the rain
While climbing through the clouds
Nobody can see me
No one can hurt me now Goodbye gravity
Goodbye enemies
I'm going up to a place where the world is small
Where I can fly above it all
If I don't make it sing my song
From here I'm weightless
No star are famous
And the world is small
And the world is small
Still rising towards the dark
Don't care what's down below
Cause no can see me
And no one has to know The atmosphere is lonely
And beautiful
I don't miss a thing, I used to know
I used to know (ohhhhh) Goodbye gravity
Goodbye enemies
I'm going up to a place where the world is small
Where I can fly above it all
If I don't make it sing my song
From here I'm weightless
No star are famous
And the world is small
I fell so tall
If there is nothing to breaking fall
It's okay, I've see it all
And maybe I was always small
But I could fly before I crawled
If I don't make it sing my song
From here I'm weightless
No start are famous
And the world is small
And the world is small
