

Sometimes I Can't Make It Alone

mae

I thought that part of me was what she'd want
but she's got the whole thing
and there's no doubt in anything she does, when she gets inside me
to think it'd be this clear above the atmosphere
I'm flying with no fear now I was always floating around head in the clouds
thinking I could make it on my own
falling down as my back hit the ground
it felt like a heartbeat tried to get out, well
I can if you take it, I tried I can't fake it
but sometimes I can't make it alone
sometimes I can't make it alone
She's staring into me with all she's got
oh what a bright thing
she fills the space between with air to breathe
she comes beside me
to think it'd be this clear above the atmosphere
I'm flying with no fear now I was always floating around, head in the clouds
thinking I could make it on my own (sometimes I can't make it on my own)
falling down as my back hit the ground
it felt like a heartbeat time to get out well
I can if you take it, I tried I can't fake it
but sometimes I can't make it alone
sometimes I can't make it alone I think I've always been afraid to fly
without a reason why
tonight, you and I go faster and faster
higher and higher
I was always floating around, head in the clouds
thinking I could make it on my own (sometimes I can't make it on my own)
falling down as my back hit the ground
it felt like a heartbeat time to get out well
I can if you take it, I tried and I can't fake it I was always floating around head, in the clouds
thinking i could make it on my own (sometimes I can't make it on my own)
falling down as my back hit the ground
it felt like a heartbeat time to get out, well
I can if you take it, I tried i cant fake it
but sometimes I can't make it alone
sometimes I can't make it alone
