

# Saturnalia

## Marilyn Manson

When all your demons die  
Even if just one survives  
I will still be here to hold you  
No matter how cold you are  
No matter how cold you are I see the Devil in your teardrop  
Take your belief  
Make it snow, let go  
And wait together until we thaw I don't wanna be another bullet hole  
In the exit sign on your road  
I don't wanna be another bullet hole  
In the exit sign on your road  
Just smile like a rifle  
Hard metal in the setting sun  
Just smile like a rifle  
Hard metal in the setting sun I was invited to eat the young  
I was invited to eat the young Starting, possession, symbolic firearms  
In the bottomless celebrity scars  
Starting, possession, symbolic firearms  
In the bottomless celebrity scars I don't wanna be another bullet hole  
In the exit sign on your road  
I don't wanna be another bullet hole  
In the exit sign on your road Just smile like a rifle  
Hard metal in the setting sun  
Just smile like a rifle  
Hard metal in the setting sun  
I was invited to eat the young  
I was invited to eat the young By the roadside all  
The bones stay clean  
Dump gas in on machine  
I will still be here to hold you  
No matter how cold you are  
No matter how cold you are Cast out now, don't fire to smell  
Earth can't sunk it, can't even know my God  
It feels like Saturnalia  
Sat-sat-sat-sat-Saturnalia  
Sat-sat-sat-sat-Saturnalia There's no exit planet  
No emergency room in this tomb  
And It's door only opens one way There's no exit planet  
No emergency room in this tomb  
And It's door only opens one way Sat-sat-sat-sat-Saturnalia  
Sat-sat-sat-sat-Saturnalia  
Sat-sat-sat-sat-Saturnalia Blinded by blackness

Just empty shells  
In the deafening void of our last sunsetBlinded by blackness  
Just empty shells  
In the deafening void of our last sunset
