Natural Disaster (Benny Benassi Remix)

Laidback Luke & Example

My friend said think all the bad things My friend said thing all the fights And then it should be easier to walk away No more sleepless nightsAnd even though I don't need you You're clearly the best thing that happened to me We should be happy ever after Happiness and laughter... what a natural disasterNeed to tell myself I don't care Need to tell myself you're not thereNeed some air, need some space (x2) Need some air... the way I'm feeling I just don't careAnd even though I don't need you You're clearly the best thing that happened to me We should be happy ever after Happiness and laughter what a natural disaster Don't take it for a fool, never We've been floating down the one way river No way back can't paddle upstream I supposed I had a fucked up dreamHad enough of you had enough of me What can I say, I'm in a one man team Scheming, dreaming wheeler dealing Feeling strange I'm in love with the sceneGeneral malice, seminal talent Two many brain sells, chemical imbalance One day soon I'll get it all examined 'Till then I'm going all Biff TannenRewrite the future, new ruler Too cool now, well it don't suit ya' This is Starship Troopers livin' in a whole other planetReboot computer (x2) Need to tell myself I don't care Need to tell myself you're not thereNeed some air, need some space (x2) Need some air... the way I'm feeling I just don't careAnd even though I don't need you You're clearly the best thing that happened to me We should be happy ever after Happiness and laughter what a natural disasterYou're far too good for me Said you're far too good for me We should be happy ever after Happiness and laughter... what a natural disaster.
