

Chemical Calisthenics (feat. Cut Chemist)

Blackalicious

Good, can you sing it faster?
I can do anything, here we go Neutron, proton, mass defect, lyrical oxidation, yo irrelevant
Mass spectrograph, your electron volt, atomic energy erupting
As I get all open on betatron, gamma rays thermo cracking
Cyclotron and any and every MIC
You're on trans iridium, if you're always uranium
Molecules, spontaneous combustion, pow Law of definite proportion, gaining weight
I'm every element of brown
Lead, gold, tin, iron, platinum, zinc, when I rap you think
Iodine nitrate activate
Red geranium, the only difference is I transmit sound
Balance was unbalanced then you add a little talent and
Careful, careful with those ingredients
They could explode and blow up if you drop then
And may hit the ground
Let it flow, yo, just let it go, get back C-A-O-H-2, wine, water solution of calcium hydroxide
Slobbin' it, C-A-O lime will make bleach powder
Galvanic metal beats stomp out louder
Dried ice, C-0 squared refrigerant
N-O-2 makes you laugh, it's laughing gas used by the dentists
I nearly added acid glue, I'm like oil of a toil, the king of chemicals And the G heat gas waved
all your mats
Chemical change, ice point, melt all your raps
Atomic weight, hold shocks, when you call
Refillable gas keep going way beyond
Biotch I'm only ill with buzzin', feel the ambiance
A diabetic process outta calm your ass
After I warm your ass, I'll give sodium
Silicate N-O-2-S-1-O-3 a water glass
Borax flexure full of brimstone sulfur
Borax acid, hip-hop preserver
C-O-2 could never put away the fire
Style aroma is scientific the lyrical fuse would be connected
To teach you chemical calisthenics The theory is that all matter is composed
Of at least three fundamental particles
Protons, electrons, neutrons, Protons charge is positive
By now you've guessed electrons are probably negatively charged
Neutrons don't follow either, neutral, in the middle, only no apologies Centered, unmoved by
yin and yang ideology
Neutron, bomb songs, electron fury
Cosmic musical radio-activity
Different points in joints within infinity Oxygen and hydrogen alive within all types of energy

Within all types of energy
Within all types of energy, within all types of energy
Within all types of energy, inside a world, inside a world
Inside a universe, inside of me existing although I can't see itHydrocarbon, nitrogen cycle,
ionization
Heavier than electric motor metals that weigh over a ton
This has been a chemist, Blackalicious creation
Clean out your desk, put your papers away 'cause class is almost doneThis is chemistry plus
calisthenics
I'm calcium plus potassium, magnesium, newspaper of sodium, sulfate
Your solvent, chloroform, remedy from the norm
Glycerin, purest form Titanium
There is no way out, when this newfy is out
Of all arms vibration, forming in a niggaSome bleachin' to teach ya religious is equal to pieces
of meteor
Eager to be here or is it, can see here I know all of all
I'ma pickin' up pretty little Cindy I'm more
I'm thinkin of more, I'm cookin' a potion, cool
