

Cherry Papers

Jay Sean

(Intro)

You took all my papers now I hit the pen
Had a different view now I'm on the fence
Never split the bill now it's making sense
We did it for the thrill that's past tense
Had some wild time with some fine wine
Could watch you all night couldn't find time
Faded conversations under cloud 9
I think of them sometimes when I am....(Pre chorus)

Driving down we are silent

Hit fourteenth

My end of path of green

(Chorus)

I know we got lost back chasing moonlight

Smoking cherry papers

Headlights make your lips shine

You know that's my favorite

Fastforward time move so quick

I'm looking at my dashboard

See that lipstick

On those cherry papers Look to my right I might be phobic

They are all that I got to remind me of you yeah

They know where you at

They know what you are doing

They know what I want

They know what I'm proving

How could I forget those circle windows

Smoke alarms and purple lando

Leftover no bubento

Listening to instrumentals(Pre chorus)(Chorus)Your love's not forgotten

I know I should have thrown them long ago

The truth is it's hard to fake it

Sometimes I just need reminders of u

Coz we divided in two(Chorus)
