

Sleepy Head

[Fisher](#)

Sleepy Head

Open your eyes my little sleepy head

it's 3 am - you're missing everything

The stars are raining down, get out of bed

We'll never have this chance again Open your eyes now sleepy head

and hold this memory for inside your head

inside your head Angels have filled the sky with fiery tails

they flash like cameras in the night

and fall into the grass to live again

as they turn into fire flies

Open your eyes get out of bed

and take this memory for inside your head

inside your head It's freezing cold, why should we care?

Climb on the roof and hold my hand

Let's live another hundred years

and meet here when the stars rain down again

rain down again Open your eyes my sleepy head

and take this memory

Open your eyes get out of bed

and hold this memory inside your head

inside your head

inside you
