

Oceans (feat. Nylo)

Emmit Fenn

What is sight to one that's blind?
How can you know dark if you have no knowledge of light?
Call me crazy but sometimes to see I close my eyes
And I've been in the dark for sometime
In the dark for sometime, ooh Don't ask, don't tell
I know how it is, I got it
I wish you well All we have is time, time to kill
All we have is time, time to kill
Before it kills us both
You're divided from your heart
Standing in the light, you still feel the dark
And I'm reminded when this gets hard
You made me promise to leave
When the love is gone Closing light years
Moving through your arms, it's so clear
You're here, I'm here, ooh
And all we have is time, time to kill
All we have is time, time to kill
Before it kills us both And don't speak, when you should be yelling
And don't think, when you know it damn well, know it damn well You know it damn well
