

Scars

Tove Lo

Scars we carry Carry with memories
Memories burned by the dark
Try to see clearly
Tears we bury
Bury in vain
Cause the pain got us falling apart Try to see clearly
Now let the healing start
The fire is out of guns
We keep it in our hearts
We're like a thousand suns
Ooh, yeah
Everyday step by step
We dare to love again
And if we lose our grips
Meet you at the end
Know they're cutting you deep
Feel the scars in your sleep What didn't kill made us made us stronger
Stories left on our skin
Wear them with everything What didn't kill us made us stronger
Oh
Don't feel lonely
Loneliness kills all the thrill from standing alone
Oh
Try to see clearly
Now let the healing start
The fire is out of guns
We keep it in our hearts
We're like a thousand suns
Ooh, yeah
Everyday step by step
We dare to love again
And if we lose our grips
Meet you at the end
Know they are cutting you deep
Feel the scars in your sleep
What didn't kill us made us stronger Stories left on our skin
Wear them with everything
What didn't kill us made us stronger
Know they are cutting you deep
Feel the scars in your sleep
What didn't kill us made us stronger Stories left on our skin
Wear them with everything

What didn't kill us make us stronger
Feet don't fail me now (no)
What didn't kill us made
What didn't kill us made us stronger
Feet don't fail me now
What didn't kill us made
What didn't kill us made us stronger
Scars we carry
