

Savage (feat. BIA)

Bahari

I am the sun, you know you need me
And you might get burned if you take too much
Don't get addicted cause, I'm gonna fade you like that rush
Is that blood on me or blush?

So what

You know I'm not a saint but I can make you pray
So get down on your knees, give me a reason I should stay
Trapped inside this madness, I know you wanna have this
So I can take advantage

Savage, savage

When you touch me you take me to heaven

When you hold me my body's a weapon

If you think that you can save me, break me down, and tame me
Here's your chance to do some damage, savage I am the type I know you drown in

You're on the rise, be careful who you trust

Don't get it twisted cause, I could be really into us

Or I can leave you just because, because

You know I'm not a saint but I can make you pray
So get down on your knees, give me a reason I should stay
Trapped inside this madness, I know you wanna have this
So I can take advantage

Savage, savage

When you touch me you take me to heaven

When you hold me my body is a weapon

If you think that you can save me, break me down, and tame me
Here's your chance to do some damage, savage, savage, savage
