

The Woods

Dierks Bentley

I know a little place we can go, yeah
Two rights a left right past the liquor store
There's a little trail only me and my know
With nothin' but tall pines
And, my hand to hold Here's where I smoked my first smoke
Drank beer from a can
Kissed the first girl
Skipped school with my friends
Where I went to turn bad times to good
Come on lay with me
No better place to be
Our little secrets safe in these trees
'Cause I hear baby it's just understood
What happens in the woods, stays in the woods
Those city lights go nine to fives tonight
No, No
Just you and me kissin' while the moon and stars shine, Yeah
Yeah, dancin' in the breeze maybe drink a little red wine
Roll around in the leaves, from the world we'll hide
This is where I smoked my first smoke
Drank beer from a can Kissed the first girl
Skipped school with my friends
Where I went to turn bad times to good
Come on lay with me
No better place to be
Our little secrets safe in these trees
'Cause I hear baby it's just understood
What happens in the woods, stays in the woods Come on girl, leave your Iphone at home
We're gonna kick it way back with a blanket and a radio
I know a little place where we can go and lay low
Smoked my first smoke
Drank beer from a can
Kissed the first girl
Skipped school with my friends
Where I went to turn bad time to good
Come on lay with me
No better place to be
Our little secrets safe in these trees
'Cause out here baby it's just understood
What happens in the woods, stays in the woods
Come on baby, let's go out to the woods
