

# Mountains

## Nonpoint

One more problem  
How you've got them  
All tied up with  
A million things to do  
Two more problems  
How I've got them  
One is someone else  
Two is you  
I hate that it had to come to this so fast  
How else would I know if we would last  
Making mountains  
Out of mole hills  
Taking fountains  
Past thier fill  
Making mountains  
Out of mole hills  
And making me  
Want to killEvery wonder  
Every question  
Everything that  
I'm not sure is real  
Every funny look  
Every stop and stare  
Every doubt in my mind  
That you still care  
I hate that it had to come to this so fast  
How else would I know if we would last  
Making mountains  
Out of mole hills  
Taking fountains  
Past thier fill  
Making mountains  
Out of mole hills  
And making me  
Want to killMaking mountains  
Taking fountains  
Shaking grounds with  
Tiny problems  
Cocreated  
From the way you  
Give direction  
With affectionMaking mountains

Out of mole hills  
Taking fountains  
Past thier fill  
Making mountains  
Out of mole hills  
And making me  
Want to kill Making mountains  
Out of mole hills  
Taking fountains  
Past thier fill  
Making mountains  
Out of mole hills  
And making me  
Want to kill Spoken:

Stage three is when the specimen undergos

A complete development of wings

It explores dry land

Perfects hunting skills

It can come freely now

Through any terrain it chances

(chances, chances, chances, chances, chances)
