

Bring It On Home

Little Big Town

You got someone here
Wants to make it alright
Someone who loves you
More than life right here You got willing arms
That'll hold you tight
A hand to lead you on
Through the night right here I know your heart
Can get all tangled up inside
But don't you keep it to yourself When your long day is over
And you can barely drag your feet
The weight of the world is on your shoulders
I know what you need, bring it on home to me
You know I know you
Like the back of my hand
But did you know I'm gonna do
All that I can right here? I'm gonna lie with you
Till you fall asleep
When the morning comes
I'm still gonna be right here, oh yes I am So take your worries
And just drop them at the door
Baby leave it all behind When your long day is over
And you can barely drag your feet
The weight of the world is on your shoulders
I know what you need, bring it on home to me Baby let me be your safe harbor
Don't let the water come and carry you away
When your long day is over
And you can barely drag your feet
The weight of the world is on your shoulders
I know what you need, bring it on home to me Oh bring it on home
Yeah bring it on home to me
Home to me
Oh bring it on, bring it on
Home to me You got someone here
Wants to make it alright
Someone who loves you
More than life right here
