Bring It On Home

Little Big Town

You got someone here Wants to make it alright Someone who loves you More than life right here You got willing arms That'll hold you tight A hand to lead you on Through the night right hereI know your heart Can get all tangled up inside But don't you keep it to yourselfWhen your long day is over And you can barely drag your feet The weight of the world is on your shoulders I know what you need, bring it on home to me You know I know you Like the back of my hand But did you know I'm gonna do All that I can right here?I'm gonna lie with you Till you fall asleep When the morning comes I'm still gonna be right here, oh yes I amSo take your worries And just drop them at the door Baby leave it all behindWhen your long day is over And you can barely drag your feet The weight of the world is on your shoulders I know what you need, bring it on home to meBaby let me be your safe harbor Don't let the water come and carry you away When your long day is over And you can barely drag your feet The weight of the world is on your shoulders I know what you need, bring it on home to meOh bring it on home Yeah bring it on home to me Home to me Oh bring it on, bring it on Home to meYou got someone here Wants to make it alright Someone who loves you More than life right here Song Discussions is protected by U.S. Patent 9401941.
