La Lune (feat. Dan Smith)

Madeon

Sometimes these memories pull us under We get lost talking, days gone by But we're not getting any younger Now it feels like real life has dragged us in its timeSo we stay awake Like we always do And we try to recreate And then nothing's changed When I'm next to you It doesn't feel the sameI would never change what our past is Written in our bones, it's who we are I just can't control where my mind goes When it goes too far So we stay awake Like we always do And we try to recreate And then nothing's changed When I'm next to you It doesn't feel the sameDoesn't matter if we change Doesn't matter at all Don't you worry about me, friend Don't you worry at allDoesn't matter if we change Doesn't matter at all Don't you worry about me, friend Don't you worry if it doesn't feel the same It doesn't feel the same It doesn't feel the same (It doesn't feel the same) (Feel the same) (Feel the same) Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
