

Roots (feat. Galantis)

Valerie Broussard

I've been known for one thing
I come and then I go
I got used to wanderin'
Livin' on the road All the times I'd love and leave
But you got a hold on me
How'd the days turn into weeks?
You and this town are growing on me We could put some roots down
All I want is you now
You know I'm done, you know I'm done running
I'm just thinking out loud
Trying out a new sound
You and I got, you and I got something
Oh, I'm finally home
Built from this rolling stone
We could put some roots down
All I want is you now
You and I got, you and I got something We could put some roots down
Put some roots down
We could put some roots down
(Roots down, roots down)
You and I got, you and I got something
We could put some roots down I know you for one thing
You'd never let me go
You shine like a beacon
Guiding me back home
All the times I'd love and leave
But you got a hold on me
How'd the days turn into weeks?
You and this town are growing on me We could put some roots down
All I want is you now
You know I'm done, you know I'm done running
I'm just thinking out loud
Trying out a new sound
You and I got, you and I got something Oh, I'm finally home
Built from this rolling stone
We could put some roots down
All I want is you now
You and I got, you and I got something We could put some roots down
Put some roots down
We could put some roots down
You and I got, you and I got something We could put some roots down
Put some roots down

We could put some roots down
(Roots down, roots down)
You and I got, you and I got something
We could put some roots down
