Chemistry of a Car Crash

Shiny Toy Guns

You're waking up
A part of me I've never known
And I've never felt so invincible
What took you so far away?You're lost for tonight again
That's what you wanted
Your arms to your side again
AgainJust take away the words I say
'Cause I know that you don't feel the same
Just go and say what's in your head
And I won't try to stop you
You hold the rights I'll never own
And I've never felt so alien
Don't tear us apart againWhat is the use of it
We? re okay, it's nothing
It's all chemistry of a car crashJust take away the words I say
'Cause I know that you don't feel the same
Just go and say what's in your head
And I won't try so you'll stayThis time I won't try and I won? t change
This time I won't try to stop you
It's all chemistry of a car crash
Just take away the words I say
'Cause I know that you don't feel the same
Just go and say what's in your head
And I won't try so you'll stayThis time I won't try and I won? t change
This time I won't try to stop you
