

Oceans (feat. Greyson Chance)

tyDi & Jack Novak

I fell in oceans with you
We swim around all the others
And dove right in the blue
I see new color with you
We lose our sense of time
Fade into something new
I fell into the deep end
Hmm...

You sought to rise above me
I tried to pull you in
Now all that I can dream of
Is a place where you're my love
But you know everybody
And you found somebody, who knows what I knew
Still want to fall with you
I want to fall in the oceans like we used to do
You know everybody
And you found someone, yeah, you think that is true
Still want to fall with you
I want to fall in the oceans like we used to
I'm feeling pressure right now
I need a pick me up but
Babe you're not around
They drop into the water
I'm living in a dream
I feel into the deep end
Hmm...

You sought to rise above me
I tried to pull you in
Now all that I can think of
Is a place where you're my love
But you know everybody
And you found somebody who knows what I knew
Still want to fall with you
I want to fall in the oceans like we used to do
You know everybody
And you found someone, yeah, you think that is true
Still want to fall with you
I want to fall in the oceans like we used to do
But you know everybody
But you know everybody
