

# Mistral Wind

## Heart

No wind when I took the watch  
My ship was still and waiting  
    I lay on that mirrored sky  
    A restless sailor waiting  
    I closed my eyes said the  
    Words of will for the gentle  
    Breathing that moves the seas  
Make my sails fillWhisper waves cloud the glass  
    Awake at last like a lover  
    It rushed around me talking sweet  
    Roll over, roll over, roll over  
    And in my ear he blew his name  
    It sound so strange but I heard it plain  
        Mistral, mistral wind  
    I have always held the wheel but  
        I let the wind steal my power  
        Spin me 'round lose my course  
        Nights run by like hours  
    Well, it would show me the way  
        To the deepest mountains  
        Too high and beautiful to be  
        Mistral, mistral wind  
        All the hours on the watch  
    I wait for that breeze to move me  
    And blow me back to that place  
        Magic space all through me  
        And I sigh your name  
        Across the empty water  
    You made a crazy dreamer out of me  
        Mistral, mistral, mistral,  
        Mistral, mistral
