

Up All Night

Kip Moore

I know the lights are out, I know it's getting late
But you're still young and we're wide awake
I've never seen a sky this damn bright
So don't go home, it just ain't right I got a good idea, I got a wild hair
There's a little spot and we could meet you there
Take the only road straight outta town
Until you see the fire, baby, don't slow down 'Cause we'll be up all night keeping up the moon
I just wanna dance, baby, dance with you
We gonna scream and shout until sunrise
We won't close it down, we'll be up all night
Baby, grab some beers and we'll grab guitars
Tell all your friends and we'll ride the stars
We'll gas the fire, try to make it last
And we'll sing it up and you can shake your ass 'Cause we'll be up all night keeping up the moon
I just wanna dance, baby, dance with you
We gonna scream and shout until sunrise
We won't close it down, we'll be up all night, alright We'll be up all night, gonna feel so free
Only got one ride, don't need no sleep
So baby, dance my way and I'll pass the wine
Wanna kiss your face and stay up all night
'Cause we'll be up all night keeping up the moon
I just wanna dance, baby, dance with you
We gonna scream and shout until sunrise
We won't close it down, we'll be up all night Yeah, up all night
