

# Mindphaser

## Front Line Assembly

"Jesus... had days like this"  
"Cyborgs - cybernetic organisms..." "Machines with living human tissue and programmed to  
destroy"  
The silence is deafening  
Regression hangs in the air  
A motionless world sits waiting  
For new codes A war of technology  
Threatens to ignite  
Digital murder  
The language of machines Mesmerised by a decade of faith  
Flowers and remorse  
A fading vision lost in time  
Tragedy on course  
Synthetic conspiracy  
Masters of the human race  
The mind now knows  
New levels of fear Implanted brain cells  
Control is gone  
We seem to believe  
Truth is regression The tension shows  
The tension shows "A quantum leap forward"  
"Full OCP binary cyborg technology"  
"State of the art destructive capabilities"  
"Commanded by a unique combination of software and organic systems"  
"Jesus... had days like this"  
The target we seek  
Slowly comes into sight  
The countdown begins  
For launch into hell The tension begins "State of the art destructive capabilities" The kill is swift  
It makes no sound  
Aggression take its toll  
Rhythm of violence  
Cuts through the air  
There's no more control  
The sky turns brighter, a evil red  
Missiles fly through the air  
Shattered dreams  
Shattered hopes  
There's bodies everywhere "Bwahahaha"  
"State of the art destructive capabilities"
