

Work

Little Big Town

You gotta work
You gotta work Push on when the day is gone
We gon' find a way
Match on, sing along
We gon' find a way
You're more than world to me
And you got me believe You gotta work
Sun up, sun down
Somebody's gotta do it
When aid done, no one's around
Somebody's gotta do it
You can sit around with your hand [?]
Get your boots on, play the ground
You gotta work
I know the road is deep
I know the journey's long
I know it's naturally
So, I've got to carry on
And when I'm in too deep
I need you to help me to be strong
It ain't gonna happen on its own
You gotta work Even in the night time, the heaven fall
We gon' find a way
Love is on, I can hear you call
We gon' find a way
If you ain't getting what you need
Then you best believe
You gotta work
Sun up, sun down
Somebody's gotta do it
When aid done, no one's around
Somebody's gotta do it
You can sit around with your hand [?]
Get your boots on, play the ground
You gotta work I know the road is deep
I know the journey's long
I know it's naturally
So, I've got to carry on
And when I'm in too deep
I need you to help me to be strong
It ain't gonna happen on its own
I know the road is deep

I know the journey's long
I know it's naturally
So, I've got to carry on
And when I'm in too deep
I need you to help me to be strong
It ain't gonna happen on its own
You gotta work
