

Dream On with You (feat. Terrence Howard)

Empire Cast

Some people spend most their lives
Looking for someone to lean on
I have had dreams once or twice
Always with no one to dream on
My world's just had to find my own line of reason
Oh mother, free them
'Cause life is a ball of twine
To be rolled up and weaved on
So I just hold on tight, keep hoping things will turn around
I'm so glad now that I finally found a love I can lean on
Finally found the truth to believe on
Finally found this dream I can dream on with you
Now some folks, they'll criticize ya
'Cause every one's got a different height they see from
They sympathise and they compromise, yeah
They look around and you'll come to find your dream's gone
But I want my life design to be all mine, I need 'em
All times and seasons
And one thing I know for sure
That'll gold mine and all pure
So I just hold on tight, keep hoping things will turn around
I'm so glad now that I finally found a love I can lean on
Finally found the truth to believe on
Finally found this dream I can dream on with you
You see in every person that you meet
There's this little piece of God
So I just dream, I'm not gonna dramatize this
Dream 'cause every one's got a different light to lead on
Dream, I just gotta handle mine and
Dream, try to find me a better way and it's on
'Cause life is a mound of clay
To be rolled up and in shape, sometimes things break
But I'm not defined to
So rest of it's on you
So I just hold on tight, keep hoping things will turn around
I'm so glad now that I finally found a love I can lean on
Finally found the truth to believe on
Finally found this dream I can dream on with you
With you, with you
With you, with you
