

# Movement

Katy B

Don't you let me down again  
Stuck in this small car, and even then  
My electric gets me further  
When did our love turn to burden? When my eyes are red and sore  
I can't see you any more  
Cause my senses turning hazy  
As our temper's going crazy Silence is the sound of now  
When I much prefer love  
Bold and loud  
Give me movement, give me movement  
I need some kind of improvement  
Give me movement, give me movement  
Let me know that you can do it  
Give me movement, give me movement  
I need some kind of improvement  
When there's no one I'd rather love  
You keep darkness 'bove the love How we're meant to move if, there's no movement [x5] Back  
to the starting point again I'm getting cozy here, my friend  
'Cause the dice aint got no numbers  
Stay here still have time to wonder Was I always like this  
Or did I have some kind of fun  
Letting go of all my stresses  
But now you got me feeling restless  
Silence is the sound of now  
When I much prefer love  
Bold and loud Give me movement, give me movement  
I need some kind of improvement  
Give me movement, give me movement  
Let me know that you can do it  
Give me movement, give me movement  
I need some kind of improvement When there's no one I'd rather love  
You keep darkness 'bove the love  
How we're meant to move if, there's no movement
