

Minus the Machine

10 Years

Not alone
The closer than you know
Now this ghost in the machines we host
The reasons we find
Over and over we replay the ride
Deep into you they spread the roots Said on lines send us a savior
Satisfied these simple behaviors, oh We want the world in the palm of our hands
So we can complete minus the machines
Dying to know in control on demand
So we can complete minus the machines
Kill the lights forever
Locked in place, pupils dial-ate
Stimulate, increasing our heart rate
Intrans by the light, higher and higher we try to fly
Burn in the veins, deep in the strain
Said on lines send us a savior
Satisfied these simple behaviors, oh We want the world in the palm of our hands
So we can complete minus the machines
Dying to know in control on demand
So we can complete minus the machines
Kill the lights forever
(So we can complete minus the machines)
We want the world in the palm of our hands
So we can complete minus the machines
Dying to know in control on demand
So we can complete minus the machines
Information's overload
So we can complete minus the machines
Information's overload
So we can complete minus the machines
Kill the lights forever
Kill the lights forever
