

# Worlds Away (feat. Emma Hewitt)

[3LAU](#)

The Universe is ours tonight  
Watching the world go by  
Spinning in a blaze of lights  
Somehow I feel like I  
Have awakened a different life  
Where everything could be alright Here there are no reasons to pretend  
Only possibility that never ends  
That's all I need In starlight we run, like a wildfire  
And these hearts are burning for today  
For once I belong  
And we are worlds away  
We're worlds away tonight, my love  
Out of the past we climb  
Away from the ties that bind  
I'm seeing it through different eyes now  
And we don't even need to try  
Just let it go and watch it fly  
Cause you and I could last a lifetime And here there are no reasons to pretend  
Only possibility that never ends  
That's all I need In starlight we run, like a wildfire  
And these hearts are burning for today  
For once I belong  
And we are worlds away  
We're worlds away tonight, my love And here there are no reasons to pretend  
In starlight we run like a wildfire  
And these hearts will never be the same  
For once I belong  
And we are worlds away  
We're worlds away tonight  
We are worlds away  
We're worlds away tonight, my love
