

Fantasy (Tritonal Air Up There Intro Mix)

[Nadia Ali](#)

How do you always know what I will say?
You seem to know me in the clearest way
I want to run and hide, keep you from finding me
You shouldn't see, what is my mystery But with the timing right
It could be paradise
To do this now
Would not be right I was just fine, yes I was fine I thought
I didn't think that I would get so lost
To have and not to hold and to pretend I'm cold
It is a lie because I melt every time And with the timing right
It could be paradise
To do this now
Would not be right
So stay away from me
You're better off to stay as far from lovin' me
Just stay a fantasy
In the dark, in the night and in my dreams And with the timing right It could be paradise
To do this now
Would not be right So stay away from me
Stay away from me So stay away from me
You're better off to stay as far from lovin' me
Just stay a fantasy
In the dark, in the night and in my dreams So stay away from me
You're better off to stay as far from lovin' me
So stay a fantasy
In the dark, in the night and in my dreams
So stay away from me
You're better off to stay as far from lovin' me
Just stay a fantasy
In the dark, in the night
In the dark, in the night
And in my dreams
