

# Gasoline

## Brand New

So he tried to put the fire out  
But you used gasoline  
When the congregation gathered around  
You screamin' "it wasn't me,"  
So there is a sickness that's going around  
But no one's got a vaccine  
I think it drowned in holy water  
I think it's time we all come clean I swear it's like dying  
To catch a ghost  
It feels like I'm trying  
To hold smoke  
I swear it's like dying  
To catch a ghost  
It feels like I'm trying  
To hold smoke When the army had to hold the line  
You were nowhere near the front  
Before the kids could tell their dog goodbye  
You were loadin' up your gun  
I want to know what is the great divide  
I wanna know what I've become  
You think that no one else is lonesome?  
You think that you're the only one?  
It feels like I'm jumping towards a train  
It feels like I'm jumping towards a train  
I'm trying to find a way  
It feels like I'm jumping towards a train  
It feels like I'm jumping towards a train  
But I'm trying to find a way
