

Never Felt Love

Little Big Town

I've seen it come and I've watched it go
The ins and outs and the highs and lows
Well I gave my heart and I paid the cost
For the loves I made there were friends I lost At the point I'd almost had enough
Like the morning sun you woke me up
You held me close and you help me see
Oh you made a believer out of me Now I'm alright, I've got you in my life
And I never felt love, ever feel so right
It's a miracle and a mystery
How the hands of fate brought you to me
I had lost all hope, had lost all faith
With each kiss you loved my fear away Now I'm alright, I got you in my life
And I never felt love ever feel so right Well it's good to feel and for once I know
That I'll never have to worry about you letting go
No matter where this road may lead
As long as I've got you with me I'll be alright, I've got you in my life now I'm alright
And I've never felt ever love feel so right
Never felt love ever feel so right
Never felt love ever feel so right
Never felt so right
Never felt love ever feel so right
Never felt love
Never felt so right
Never felt love ever feel so right
Never felt love
