

# Lights On

## Trip Lee

Oh The Lights x4

Oh oooooo...

Oho The Lights x2

We don't know where we going

We don't know where we going

Aye, look around inside door, I block everything

Like a million man march, I'ma talking bout everything

Going hard, do it so, do it mind, right do applaud

Can i get a little light though, there is some we can fight for

Aye we so blind we don't know, Oh then how would we go

Go with speed ahead, flying but we low

But we don't know this way He got us

No more Falling, it okay

Don't know he can give us everything like we never saw before

Till the light keeps glowing, we don't know where we going

But ain't no Google maps, life is like our airline is broken

We know you got it, little we know you got it

Only you could take us higher, You're the Pilot

Lights Please!

Oho The Lights

We don't know where we going (It is so far from my home)

We don't know where we going (like I got no powers on)

We don't know where we going (My home is gone)

They need you to show'em so turn them Lights On

We don't know where we going (It is so far from my home)

We don't know where we going (like I got no powers on)

[?] Turn them lights on Oho The Lights

We don't know where we going (It is so far from my home)

We don't know where we going (like I got no powers on)

We don't know where we going (My home is gone)

They need you to show'em so turn them Lights On

We don't know where we going (It is so far from my home)

We don't know where we going (like I got no powers on)

[?] Turn them lights on Can you turn the lights On?

Can you turn the lights On?
