California Queen

Wolfmother

Slipped off into the slip stream She's looking for the summer dream Came down from the mountain To find another machineRunning down all the by-ways Listen to all that she says Couldn't see very far Find out all that you areMy California Queen Fully air reconditioned Self-made man machine With a home made hydroponic Wait to find out what it meansMy California QueenStanding in front of the rainbow Could you tell me where do all the people go? Rising from the mystic haze Standing in front of all creationWith all their mystic ways They seem to control the days Somebody got to get behind it To find out all that it meansMy California Queen Oh tell me what it means My California Queen Standing in front of the rainbow Could you tell me where do all the people go? Rising from the mystic haze Standing in front of all creation
