Live Forever

Little Big Town

You roll through life like a roaring fire
I bring the rain like a thunderstorm
Yeah, we found peace on a battlefield
It all makes sense in love and war
It all makes sense in love and warYou and me, wild as a willow in a hurricane
Strong enough to stand in the stormy weather
We might be crazy enough to make history
'Cause the world just ain't the same since we got together
And if we don't die young we might just live forever
There are kings and queens up on their thrones
That have a love like you and me
Kingdoms rise and kingdoms fall, but love has lasted eternally
Love has last eternallyYou and me, wild as a willow in a hurricane
Strong enough to stand in the stormy weather
We might be crazy enough to make history
'Cause the world just ain't the same since we got together
And if we don't die young we might just live foreverThey might sing us in a song
Or write our names up in the sky
Even when it's carved in stone
A love like ours goes on and on
A love like ours goes on and on
You and me, wild as a willow in a hurricane
Strong enough to stand in the stormy weather
We might be crazy enough to make history
'Cause the world just ain't the same since we got together
And if we don't die young we might just live foreverYou roll through life like a roaring fire
I bring the rain liek a thunderstorm
