Baba Says Cool for Thought

Lupe Fiasco

They thought it was cool to burn crosses in your front lawn As they hung you from trees in your backyard They thought it was cool to leave you thirsty and stranded, Katrina He thought it was cool to carry a gun in his classroom And open fire, Virginia Tech, Columbine, stop the violenceThey thought it was cool to tare down the projects And put up million dollar condos, gentrification They think it's cool to stand on the block Hiding products in their socks making quick dime bag dollars They think its cool to to ride down on you In blue and white unmarked cars bustin' you upside yo head Freeze 'cause the problem is we think it's cool too Check your ingredients before you overdose on the cool Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
