

No One Said It Would Be Easy

Cloud Cult

You came up from the ground
From a million little pieces
You're a pretty human being
Yeah, you're a pretty human being
When it all comes crashing down
Try to understand your meaning
No one said it would be easy
Cause living, it ain't easy.
And you were sewn together with a tapestry of molecules
A billion baby galaxies in wide open spaces
And everything you need is here
Everything you fear is here
And it's holding you up
It just keeps holding you up.
You came up from the ground
From a million little pieces
You're a pretty human being
Yeah, you're a pretty human being
When it all comes crashing down
You try to understand your meaning
No one said it would be easy
this living, it ain't easy
