

# Natural Disaster (Original)

## Laidback Luke & Example

My friend said think all the bad things  
My friend said thing all the fights  
And then it should be easier to walk away  
No more sleepless nights And even though I don't need you  
You're clearly the best thing that happened to me  
We should be happy ever after  
Happiness and laughter... what a natural disaster Need to tell myself I don't care  
Need to tell myself you're not there Need some air, need some space (x2)  
Need some air... the way I'm feeling I just don't care And even though I don't need you  
You're clearly the best thing that happened to me  
We should be happy ever after  
Happiness and laughter what a natural disaster  
Don't take it for a fool, never  
We've been floating down the one way river  
No way back can't paddle upstream  
I supposed I had a fucked up dream Had enough of you had enough of me  
What can I say, I'm in a one man team  
Scheming, dreaming wheeler dealing  
Feeling strange I'm in love with the scene General malice, seminal talent  
Two many brain sells, chemical imbalance  
One day soon I'll get it all examined  
'Till then I'm going all Biff Tannen Rewrite the future, new ruler  
Too cool now, well it don't suit ya'  
This is Starship Troopers livin' in a whole other planet Reboot computer (x2)  
Need to tell myself I don't care  
Need to tell myself you're not there Need some air, need some space (x2)  
Need some air... the way I'm feeling I just don't care And even though I don't need you  
You're clearly the best thing that happened to me  
We should be happy ever after  
Happiness and laughter what a natural disaster You're far too good for me  
Said you're far too good for me  
We should be happy ever after  
Happiness and laughter... what a natural disaster.
